INNOVATING DIGITAL SOLUTIONS | BUILDING THE FUTURE

Completed Projects

RF Meat

<https://rfmeat.com/>

MeatChain by RF Meat Supply Chain is a specialized SaaS platform designed to give meat distributors complete visibility and control over their supply networks from farm to fork. The software offers essential features such as real-time cold chain temperature monitoring, GPS fleet tracking, and automated warehouse inspections to ensure continuous HACCP compliance. To accommodate businesses of all sizes, the service provides a scalable subscription model that ranges from a free starter package for small butcher shops to comprehensive enterprise solutions.

Clock Sure

<https://clocksureai.com/>

ClockSure is a specialized construction SaaS platform in the Philippines that enables contractors to seamlessly track their crews from any location. The software utilizes modern tools like GPS geofencing and AI biometric face verification to eliminate ghost employees and ensure accurate on-site attendance. Additionally, ClockSure streamlines workforce management by offering precise time tracking, full audit trails, and automated real-time payroll computation across flexible subscription plans.

Skin Logiq

<https://skinlogiqph.com/>

SkinLogiQ Aesthetics is a premium beauty and skincare clinic in the Philippines that provides expert treatments tailored for both men and women. Backed by certified aestheticians and years of experience, the clinic specializes in a wide range of professional hair removal and waxing services, alongside skin-brightening treatments and eyebrow tattooing. To ensure maximum client comfort and convenience, SkinLogiQ Aesthetics utilizes the finest products and offers both flexible home service options and easy appointment booking through various social messaging platforms.

DYTI

<https://dyti.lovable.app/>

DYTI is a premium brand specializing in sustainably harvested seafood from pristine ocean waters. The company offers a curated selection of fresh ocean delicacies, including top-tier shrimp, octopus, and fish. Guided by the philosophy of "Perfecting the Science of Freshness," DYTI provides consumers with high-quality, environmentally conscious seafood options.

RMJ Catering

<https://rmj.lovable.app/>

The RMJ application serves as a digital management portal for RMJ Catering, featuring dedicated access gateways tailored for Staff, Admin, and Client users. The platform includes built-in functionality allowing users to easily scan and register their RMJ Cards to streamline transactions or access. Additionally, the interface highlights several key service locations across the Philippines, including major corporate hubs like KMC Armstrong in Makati, SM North in Quezon City, and the Pinnacle Axis Tower in Alabang.

YS SASE Holdings

<https://yssase88.lovable.app/>

YS Sase 88 Holdings Corporation is a professional lending institution in the Philippines dedicated to empowering clients through accessible and transparent financial services. The company offers a diverse portfolio of customizable loan products, including business financing, specialized packages for doctors and OFWs, real estate financing ("Sangla Titulo"), and auto-collateral loans ("Sangla ORCR") covering various vehicle types. To best accommodate its clients' financial journeys, YS Sase 88 provides competitive low-interest rates, flexible payment terms extending up to five years, and rapid processing that yields approvals within 24 to 48 hours.

Ongoing Projects

Himap Aggregator Site

<https://resolutebpo.vercel.app/>

Resolute is a comprehensive Healthcare BPO (Business Process Outsourcing) provider that delivers tailored, scalable support solutions to a wide range of medical organizations. The company offers specialized administrative and clinical services, including medical billing and coding, 24/7 patient support desk operations, pharmacy processing, and HIPAA-compliant medical transcription. By deploying highly trained and certified professionals, Resolute empowers healthcare leaders—from solo practitioners to large health systems—to optimize their operational efficiency, reduce costs, and elevate the overall patient experience.

Senior Living Aggregator Site

<https://yssase88.com/>

SeniorLiving PH (hosted at yssase88.com) is a dedicated online platform designed to help Filipino families find trusted, vetted assisted living facilities and senior care homes across the Philippines. Serving as a transparent and completely free directory for families, the service simplifies the often overwhelming search process by matching users with care providers based on their specific location, budget, and personalized healthcare requirements. Additionally, the platform features an innovative "Family Dashboard" that allows relatives—especially those living abroad—to conveniently monitor their loved one's daily health metrics and receive real-time care updates from anywhere in the world.

Senior Living Management System

<https://care-system-iota.vercel.app/>

Care System 2.0 (by Kyte) is a modern care management platform designed specifically to streamline daily operations and organize patient records within assisted living facilities. The software features an intuitive interface with actionable, secure checklists that sync instantly in real-time across all devices, ensuring staff are always up to date on their tasks. To guarantee maximum privacy, the platform also employs enterprise-grade Row Level Security, ensuring that all facility data remains strictly siloed and protected.

CCAP Vendor Platform

<https://vendor-platform-two.vercel.app/>

The Vendor Platform serves as a specialized directory and verification tool specifically designed to streamline modern BPO (Business Process Outsourcing) operations. By successfully vetting suppliers, contractors, and various service providers, the platform dramatically reduces logistical complexities and allows BPO operators to confidently focus on scaling their business. Furthermore, the site showcases an expansive and trusted network, prominently displaying its active partnerships with numerous recognized CCAP (Contact Center Association of the Philippines) member companies.

Bayport West Naia Garden

<https://bayport-two.vercel.app/>

The Bayport West application serves as an interactive property availability dashboard specifically designed for the Bayport West Waterfront Complex. The platform provides a comprehensive overview of four distinct 20-floor residential buildings—Towers A, B, C, and D—which individually house 160 residential units. Through an easy-to-use interface, users and administrators can click on specific towers to view real-time occupancy metrics that categorize each unit as available, taken, or reserved.
